DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by

Landau et al 5,638,164.Referring to claims 1 and 9, Landau discloses in figures 1-3 a tracking system comprising: capturing at least one lower-resolution image within a field of view of the missile warning system; identifying a threat from the captured lower-resolution image or images (col. 2:26-38); identifying features surrounding the threat from a captured lower-resolution image utilized in identifying the threat (col. 2:31-33); capturing a higher-resolution image within a field of view of the fine tracking system; and identifying a location of a threat within this captured higher-resolution image as a function of the identified features (col. 2:39-45).

Referring to claims 2-8 and 10-15, Landau teaches sensing infrared radiation (see col. 1;10-21), capturing a sequence of low-resolution images until a target is found "features", or any other criteria "threshold" and identifying the threat from the high resolution image (see col. 2:62 to col. 3:21).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/593,358

Art Unit: 3662

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over landau US 5,638,164. Landau discloses in figures 1-3 a tracking system comprising: capturing at least one lower-resolution image within a field of view of the missile warning system and identifying a threat from the captured lower-resolution image or images (see col. 2 lines 26-38): identifying features surrounding the threat from a captured lower- resolution image utilized in identifying the threat (col. 2 lines 31-33); capturing a higher-resolution image within a field of view of the line tracking system and identifying a location of a threat within this captured higher-resolution image as a function of the identified features (see col. 2 lines 39-45). Landau does not teach the system for a missile warning subsystem; however. Landau's system is design to detect all types of target that require fast identification and response tune (see col. 1 lines 33-41). Therefore, it would have been obvious to modify Landau's system LO he used for a missile warning system.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ISAM ALSOMIRI whose telephone number is (571)272-6970. The examiner can normally be reached on M-TH 6am-3pm.

Art Unit: 3662

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on 571-272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
